

JACKSON MORGAN

SOFTWARE ENGINEER

PROFILE

Experienced JavaScript developer with a passion for React and creating great UI's. Very comfortable with Ruby + Ruby on Rails and adept at solving problems regardless of the technologies used. Seeking a position as a front-end or full stack developer at a company with a strong and ethical culture, solving problems that help make peoples lives easier. Switching careers from the service industry through a desire to improve my community and the human culture.

PROJECTS

reactJack | [GitHub](#) | [Demo](#)

A blackjack card game simulator (best on Safari)

- Built with React/Redux and Ruby on Rails
- Manage state of the application to display data that persists through all routes and in the database
- Apply lifecycle methods to determine when and what should be updated in the UI

SoundBar | [GitHub](#) | [Demo](#)

An instrument resale database

- Utilize Ruby on Rails to build a full application in MVC style with RESTful routing
- Implement user authentication via Rails sessions and bcrypt to ensure a secure web session for users
- Built full CRUD functionality for multiple models in application

myNextBeer | [GitHub](#) | [Demo](#)

An application that will randomly generate a new beer for you to try

- A single page vanilla javascript application that uses ES6's class syntax and object oriented paradigm
- Respond to user input with proper updating of page to display desired content
- Manipulate DOM elements to provide a seamless UI

PROFESSIONAL EXPERIENCE

Bartender

Tannery Row Ale House, Buford, GA, June 2020 – Present

- Communicate with up to four different teams in the company to facilitate effective delivery of product
- Balance job duties and dependencies from other teams
- Use foresight to predict problems that could arise in a given situation

Server

Bigg Daddy's Restaurant & Tavern, Cornelia, GA, August 2019 – May 2020

Server

Troll Tavern, Helen, GA, August 2018 – August 2019

706-974-6486
